Foreword	7
Introduction	9

## CHAPTER 1 **Understanding Cerebral Palsy**

- |                                  |    |
|----------------------------------|----|
| 1. An Overview of Cerebral Palsy | 14 |
|----------------------------------|----|
- Scott J. Polzin, Teresa G. Odle,  
and Tish Davidson*

Cerebral palsy is a group of disorders of movement and posture caused by brain damage before, during, or after birth.

- |  |    |
|--|----|
| 2. Cerebral Palsy Research Focuses on Prevention and Treatment | 27 |
|--|----|
- National Institute of Neurological  
Disorders and Stroke*

Researchers are looking for ways to prevent cerebral palsy by preventing brain injuries from occurring in the first place.

- |  |    |
|--|----|
| 3. New Chemicals May Help Prevent Cerebral Palsy | 35 |
|--|----|
- Megan Fellman*

Chemists have discovered new chemical compounds that may help prevent cerebral palsy.

- |   |    |
|---|----|
| 4. Looking for a Genetic Cause for Cerebral Palsy | 41 |
|---|----|
- University of Adelaide*

Australian researchers are undertaking a huge study to find a genetic link for cerebral palsy.

5. Hypothermia May Help Prevent Cerebral Palsy 46

*Elizabeth Fernandez*

Newborns at risk of developing cerebral palsy are cooled down to lessen brain damage and reduce future problems.

6. Robotic Therapy Holds Promise for Cerebral Palsy Patients 52

*Anne Trafton*

Children with cerebral palsy are being helped by robotic devices originally developed to assist stroke patients in learning to control their arms and legs.

## **CHAPTER 2**      **Controversies Surrounding Cerebral Palsy**

1. Cord Blood Infusions Offer Hope for Babies with Cerebral Palsy 58

*Bob Considine*

Anecdotal evidence indicates that stem cells derived from stored umbilical cord blood may alleviate symptoms of cerebral palsy.

2. Claims That Cord Blood Infusions Cure Cerebral Palsy Are Exaggerated 64

*Brenda Patoine*

Media reports claiming miraculous stem cell cures for cerebral palsy are exaggerated. Additional scientific studies are needed to assess the extent of the benefits of cord blood stem cells.

3. Fetal Monitoring Can Help Prevent Cerebral Palsy 72

*Howard A. Janet*

Monitoring a fetus's heart rate during labor can help prevent cerebral palsy from occurring.

4. Whether Fetal Monitoring Is Beneficial or Harmful Is Unclear 82  
*Jane Brody*  
There is continuing controversy about whether fetal monitoring does more harm than good.
5. Botox Treatments for Cerebral Palsy Are Risky 88  
*Lisa Girion*  
Botox has become a common treatment for the muscle spasticity associated with cerebral palsy. It may, however, cause harm and is blamed for the death of at least one child who received the treatment.
6. Using Botox to Treat Cerebral Palsy Is Worth the Risk 95  
*Ellen Seidman*  
The mother of a child with cerebral palsy says Botox has helped her son, and she will continue getting him the injections.
7. Complementary and Alternative Medicine May Help People with Cerebral Palsy 100  
*Gregory S. Liptak*  
Many people with cerebral palsy are turning to complementary and alternative medicine, and while some treatments warrant further research, many people report benefits from the treatments.

## **CHAPTER 3**    **Personal Experiences with Cerebral Palsy**

1. Facing Fears and Climbing Mountains 109  
*Bonner Paddock, Interviewed by Brian Helfrich*  
Bonner Paddock has not let cerebral palsy stop him from running a marathon or climbing mountains.

2. Focusing on Ability, Not Disability	114
<i>Glenda Watson Hyatt, Interviewed by Fernanda</i>	
In an interview about her life with cerebral palsy, a young woman shares her desire to be independent and her refusal to give in to self-pity.	
3. A Teen Triumphs over His Disability	118
<i>Keith</i>	
Teenager Keith says cerebral palsy has made him a stronger person. With determination and a positive attitude, he overcame many challenges to succeed in high school.
