CONTENTS

ABBREVIATIONS LIST	3
INTRODUCTION.....	7
NATIONAL AND COMMUNITY LEGISLATION IN THE FIELD.....	8
I. GENERAL NOTIONS REGARDING IONIZING RADIATION	9
1.1. Radiation classification, radiation sources.....	9
1.2. The source of ionizing radiation, natural and artificial sources of radiation.....	12
1.3. Types of ionizing radiation and their penetrating power.....	13
1.4. Interaction of ionizing radiation with the substance.....	16
1.5. Detection of ionizing radiation.....	17
1.6. Types of radiation detectors.....	17
1.7. Exposure to ionizing radiation.....	18
II. NON-IONIZING RADIATION	20
2.1. Definitions of radiation.....	20
2.2. The effects of non-ionizing radiation.....	21
2.3. Determining the exposure of employees and others to non-ionizing radiation.....	25
2.4. Determining the exposure of an employee and another person to non-ionizing radiation.....	26
2.5. Minimum scope of health protection measures for employees working with non - ionizing radiation.....	27
2.6. Minimum scope of information provided to an employee for occupational health protection.....	27
III. EFFECTS OF IONIZING AND NON-IONIZING RADIATION ON HEALTH	28
3.1. Effects of ionizing radiation on health.....	28
3.2. Mechanisms of production of biological effects.....	28
3.3. Deterministic effects.....	30
3.4. Stochastic effects.....	34
3.4.1. Radio induced cancers.....	35
3.5. Teratogenic effects.....	36
3.6. Genetic effects.....	37
3.7. Immediate injuries.....	38
3.8. Hereditary defects.....	38
3.9. Collective risk.....	40

3.10. Records of personnel working with radiation.....	40
IV. PROTECTION AGAINST IONIZING AND NON-IONIZING RADIATION.....	42
4.1. Providing medical assistance in accidents with radioactive contamination.....	42
4.2. Basic principles of the radiological protection system.....	44
4.3. International principles.....	45
4.4. Limitations.....	46
V. BASIC PRINCIPLES AND RADIOLOGICAL PROTECTION MEASURES.....	47
5.1. Basic principles of radiological protection.....	47
5.2. Protective measures.....	49
5.3. International and national bodies with a role in radiological protection.....	51
VI. BENEFITS AND APPLICATIONS OF IONIZING RADIATION.....	52
VII. RADIATION PROTECTION IN THE DENTAL OFFICE.....	53
7.1. Patient consent.....	53
7.2. Useful irradiation of the patient and decrease of unnecessary irradiation.....	53
7.3. X-ray selection criteria.....	54
7.4. Image receivers.....	58
7.5. Lead apron and thyroid collar.....	59
7.6. Radiation protection of personnel.....	60
7.7. Classification of radiological safety zones.....	63
7.8. Infection control in the dental radiology office.....	67
Tests.....	70
Answers to tests.....	74
BIBLIOGRAPHY.....	75
