SUMMARY

| | |
|--|----|
| CHAPTER 1. Treatment Plan in Periodontology. Supragingival Scaling | 7 |
| 1.1. Rationale and aim of periodontitis treatment | 7 |
| 1.2. Initial therapy or hygiene phase or nonsurgical periodontal treatment | 9 |
| 1.2.1. <i>Personal plaque control</i> | 10 |
| 1.2.2. <i>Supragingival scaling</i> | 12 |
| 1.2.3. <i>Technique of supragingival scaling</i> | 14 |
| 1.2.4. <i>Elimination of local risk factors</i> | 15 |
| <i>References</i> | 17 |
| CHAPTER 2. Scaling and Root Planing | 19 |
| 2.1. Calculus: risk factor for periodontal disease | 19 |
| 2.2. Place of scaling/ root planing in periodontitis therapy. Terms, definitions | 19 |
| 2.3. Personal supragingival biofilm control | 21 |
| 2.3.1. <i>Importance of personal supragingival biofilm control</i> | 21 |
| 2.3.2. <i>Personal supragingival biofilm control</i> | 22 |
| 2.3.3. <i>The adjuvant effect of anti-plaque chemical agents for personal plaque control</i> | 22 |
| 2.4. Subgingival scaling/root planing | 22 |
| 2.4.1. <i>Place in the treatment plan</i> | 22 |
| 2.4.2. <i>Indications of scaling and root planing</i> | 23 |
| 2.4.3. <i>Effects of sub-gingival scaling and root planing</i> | 23 |
| 2.4.4. <i>Risk factors that influence the nonsurgical therapy (SRP) outcome</i> | 25 |
| 2.4.5. <i>Scaling and root planing: preparation and post-operative care</i> | 26 |
| 2.4.6. Mechanical scaling | 26 |
| 2.4.7. <i>“Full mouth disinfection”</i> | 29 |
| 2.4.8. <i>Other adjuvant approaches to SRP</i> | 30 |
| 2.4.9. <i>Secondary effects of SRP</i> | 31 |
| 2.5. Dentinal hypersensitivity | 33 |
| <i>References</i> | 40 |
| CHAPTER 3. Scaling and Root Planing. Manual Techniques for Instrumentation | 49 |
| 3.1. Design of periodontal instruments used for SRP. Components | 49 |
| 3.2. Types of curettes used for SRP | 51 |
| 3.2.1. <i>Generalities</i> | 51 |
| 3.2.2. <i>Universal curettes</i> | 52 |
| 3.2.3. <i>Area-specific curettes or Gracey Curettes</i> | 52 |
| 3.3. Step by step protocol for scaling and root planing | 54 |
| <i>References</i> | 59 |
| CHAPTER 4. Access Flap for Periodontal Pocket Reduction | 61 |
| 4.1. The aim of the surgical phase for periodontitis treatment | 61 |
| 4.2. Definition of terms | 62 |
| 4.3. Flap classification | 63 |
| 4.4. Indications and advantages of access flap | 64 |

| | |
|--|-----|
| 4.5 Type of incisions for the conventional access flap | 65 |
| 4.6 Types of access flap | 66 |
| 4.6.1. <i>Modified Widman flap</i> | 66 |
| 4.6.2. <i>Undisplaced flap</i> | 67 |
| 4.6.3. <i>Apically Displaced Flap</i> | 67 |
| 4.7 Postoperative care | 68 |
| 4.8.Osseous resective/ recontouring surgical procedures | 69 |
| 4.8.1. <i>Objectives.Terms</i> | 69 |
| 4.8.2. <i>Indications. Contraindications</i> | 70 |
| 4.8.3. <i>Osseous resection technique</i> | 70 |
| <i>References</i> | 74 |
| | |
| CHAPTER 5. Periodontal Regenerative Therapy | 75 |
| 5.1. Periodontal regeneration- general aspects | 75 |
| 5.2. Intrinsic regeneration of the periodontal tissues | 77 |
| 5.3. Phases of periodontal wound healing | 78 |
| 5.4. Models of periodontal wound healing after surgical procedures | 80 |
| 5.5. Guided tissue regeneration | 81 |
| 5.5.1. <i>The principle of the guided tissue regeneration</i> | 81 |
| 5.5.2. <i>Classification of the membranes used in GTR. The disadvantages of non-resorbable membranes</i> | 82 |
| 5.5.3. <i>Resorbable membranes</i> | 83 |
| 5.5.4. <i>The results of GTR in vertical defects (infra-osseous)</i> | 84 |
| 5.6.Bone substitutes | 85 |
| 5.6.1. <i>General aspects</i> | 85 |
| 5.6.2. <i>Autogenous osseous grafts</i> | 86 |
| 5.6.3. <i>Allogenic bone grafts</i> | 86 |
| 5.6.4. <i>Xenografts</i> | 90 |
| 5.7. Biomolecules for periodontal regeneration | 93 |
| 5.7.1. <i>Definition. Classification</i> | 93 |
| 5.7.2. <i>Enamel matrix derivative (EMD)</i> | 94 |
| 5.8. Mini- invasive surgical procedures | 95 |
| 5.9. Relationship between periodontal regeneration and endodontic and orthodontic treatments | 96 |
| 5.10. Factors influencing the outcomes of infra-bony defect treatment | 96 |
| 5.11. Instruments and materials | 98 |
| <i>References</i> | 98 |
| | |
| CHAPTER 6. Gingival Recessions | 107 |
| 6.1.The etiology of gingival recessions | 107 |
| 6.2.The pathogenesis of gingival recessions | 110 |
| 6.3. Classification of gingival recessions | 110 |
| 6.3.1. <i>Miller classification</i> | 110 |
| 6.3.2. <i>Classification of gingival recessions based on proximal tissue loss</i> | 111 |
| 6.4. Nonsurgical treatment of gingival recessions | 111 |

| | |
|--|-----|
| 6.5.The surgical treatment of gingival recessions | 112 |
| 6.5.1. <i>Definition of the term. Indications. Classification of surgical procedures</i> | 112 |
| 6.5.2. <i>Coronally advanced flap</i> | 114 |
| 6.5.3. <i>Bilaminar technique of root coverage</i> | 115 |
| 6.5.4. <i>Anatomical limits for graft harvesting</i> | 116 |
| 6.5.5. <i>Efficacy of periodontal plastic surgeries</i> | 116 |
| 6.5.6. <i>Prognostic factors of root coverage techniques</i> | 118 |
| 6.6. Decision algorithms in choosing the surgical root coverage technique | 121 |
| <i>References</i> | 122 |
| | |
| CHAPTER 7. Splinting Mobile Teeth | 127 |
| 7.1. Causes of pathological tooth mobility and splinting objectives | 127 |
| 7.2. Indications and contraindication of teeth splinting | 128 |
| 7.3. Classification of types of splints | 129 |
| 7.4. Clinical protocol for manufacturing a provisional splint using fibre reinforced composite material | 133 |
| <i>References</i> | 136 |
| | |
| CHAPTER 8. Provisional Restorations In The Periodontal Treatment | 138 |
| 8.1. Generalities | 138 |
| 8.2. Requirements for correct provisional restorations | 139 |
| 8.2.1 <i>Dental requirements</i> | 139 |
| 8.2.2. <i>Biological requirements for the protection of the pulpo-dental complex</i> | 140 |
| 8.2.3. <i>Periodontal requirements</i> | 142 |
| 8.2.4. <i>Occlusal requirements</i> | 145 |
| 8.2.5 <i>Esthetic requirements</i> | 145 |
| 8.3. Materials used for the provisional prosthetic restorations | 146 |
| 8.3.1 <i>Properties</i> | 146 |
| 8.3.2. <i>Classification of materials used for provisional restoration according their curing mode</i> | 146 |
| 8.3.3. <i>Provisional materials classification according to their composition</i> | 147 |
| 8.4. Techniques for manufacturing fixed provisional restorations. | 148 |
| 8.5. Clinical protocol for the manufacturing of a provisional bridge using the iso-impression technique (Scutan technique) | 152 |
| 8.6. The cementation and the maintenance of the provisional restorations.... | 154 |
| <i>References</i> | 155 |
