CONTENT

Preface.....	5
1. Congenital disorders of head and neck development in children population.....	6
1.1. Disorder of the embryonic development of the face and jaws. Etiology. Pathogenesis.....	6
1.2 Embryology of the head and face.....	12
1.3 Developmental disorders.....	18
2. Congenital malformation of the face.....	35
2.1. General characteristic of malformations of the face.....	35
2.2. Embryological development of the face.....	36
2.3. Facial malformations. Classification. Clinical manifestation...	40
2.4. Cleft lip. Clinical picture. Diagnosis. Treatment approach.	46
2.5. Postoperative details. Complications.....	54
3. Congenital clefts palate of the palate. Clinical manifestation. Methods of diagnosis and treatment.....	58
3.1. Anatomy of the normal and cleft human palate.....	58
3.2. Frequency. The etiology. The clinical picture cleft palate..	60
3.3. Functional disorders in complete uni and bilaterally cleft..	67
3.4. Treatment and profilaxy of complications in the complete cleft lip and palate.....	70
3.5. Complications.....	79
3.6. Follow-up and principles of rehabilitation of children with cleft lip and palate.....	82
3.7. The complex rehabilitation of children with clefts lip/palate...	84
4.General peculiarities of tumor lesions in children. Principles of classification, diagnosis and treatment. Soft tissure tumors in head and neck area.....	90
4.1. General characteristic. Etiology. Peculiarities in children...	90
4.2 Principles of classification of tumors in oromaxillofacial region.....	96
4.3. General principles of diagnosis and treatment. Complaints and anamnesis.....	97
4.4. Morphological and imagingdiagnosis.....	100
4.5. Principles of treatment.....	102
4.6. The tumors and cysts of the salivary glands.....	116
5. Benign tumors in children. General characteristic tumors	

in head and neck area. Odontogenic and non-dontogenic tumors in children.....	124
5.1. General characteristic tumors in head and neck area. Etiology..	124
5.2. Peculiarities in clinical signs and symptoms of pediatric jaw tumors.....	126
5.3. Classification of neoformations of maxillary bones.....	128
5.4. Clinical diagnosis.....	131
5.5. Radiographic and morphological study.....	135
5.6. The odontogenic cysts of the jaws in the primary and permanent dentition.....	140
5.7. Nonodontogenic cysts.....	148
6. Benign odontogenic and non-odontogenic tumors and tumor-like lesion of the jaw in children and adolescents.....	153
6.1. Benign non-odontogenic tumors in children and adolescents.....	153
6.2. Benign odontogenic tumors in children and adolescents....	133
6.3. Pseudotumors of maxillofacial bones.....	167
7. Fetal tumors. Malignant tumors of the soft parts and facial bones in children.....	177
7.1. Fetal tumors. Etiology and mechanisms of carcinogenesis. Classification.....	177
7.2. Pediatric Head and Neck Tumors.....	181
7.3. The peculiarities and diagnosis of malignancies in children.....	183
