Medical Dosage Calculations
A Dimensional Analysis Approach

June L. Olsen, MS, RN
Professor of Nursing (Emeritus)
College of Staten Island
Staten Island, NY

Anthony Patrick Giangrasso, PhD
Professor of Mathematics
LaGuardia Community College
Long Island City, NY

Dolores M. Shrimpton, MA, RN
Professor of Nursing
Department of Nursing
Kingsborough Community College
Brooklyn, NY
Contents

Unit 1 Basic Calculation Skills and Introduction to Medication Administration 1

Chapter 1 Review of Arithmetic for Medical Dosage Calculations 2
Diagnostic Test of Arithmetic 3
Changing Decimal Numbers and Whole Numbers to Fractions 5
    Calculator 6
Ratios 7
Changing Fractions to Decimal Numbers 8
Rounding Decimal Numbers 10
    Rounding Off 10
    Rounding Down 10
Adding Decimal Numbers 11
Subtracting Decimal Numbers 11
Multiplying Decimal Numbers 12
Dividing Decimal Numbers 13
Estimating Answers 14
Multiplying Fractions 15
Dividing Fractions 16
Complex Fractions 17
Addition and Subtraction of Fractions 19
    Same Denominators 19
    Different Denominators 20
Percentages 21
    Percent of Change 23
Summary 24
Practice Sets 24

Chapter 2 Safe and Accurate Drug Administration 28
The Drug Administration Process 29
Preventing Medication Errors 29
Six Rights of Medication Administration 29
    The Right Drug 30
    The Right Dose 31
    The Right Route 33
    The Right Time 35
Chapter 3  **Dimensional Analysis**  75

**Introduction to Dimensional Analysis**  76

The Mathematical Foundation for Dimensional Analysis  76

**Changing a Single Unit of Measurement to Another Single Unit of Measurement**  78

Simple (One-Step) Problems with Single Units of Measurement  78

Complex (Multi-Step) Problems with Single Units of Measurement  82

**Changing One Rate to Another Rate**  85

Simple (One-Step) Problems with Rates  85

Complex (Multi-Step) Problems with Rates  87

Summary  89

Practice Sets  90

Unit 2  **Systems of Measurement**  93

Chapter 4  **The Household and Metric Systems**  94

The Household System  95

Liquid Volume in the Household System  95

Weight in the Household System  96

Length in the Household System  97

Decimal-Based Systems  98

The Metric System  99

Liquid Volume in the Metric System  100

Weight in the Metric System  102

Length in the Metric System  105

Summary  106

Practice Sets  107

Cumulative Review Exercises  111
Chapter 8  **Preparation of Solutions**  207
Determining the Strength of a Solution  208
   Strengths of Solutions as Ratios, Fractions, and Percents  208
   Liquid Solutes  210
   Dry Solutes  212
Determining the Amount of Solute in a Given Amount of Solution  214
Determining the Amount of Solution That Contains a Given Amount of Solute  217
Irrigating Solutions, Soaks, and Oral Feedings  220
Summary  222
**CASE STUDY 8.1**  222
Practice Sets  224
Cumulative Review Exercises  229

Chapter 9  **Parenteral Medications**  230
Parenteral Medications  231
Parenteral Medications Supplied as Liquids  231
Parenteral Medications Supplied in Powdered Form  237
Heparin  244
Summary  248
**CASE STUDY 9.1**  249
Practice Sets  252
Cumulative Review Exercises  265

Unit 4  Infusions and Pediatric Dosages  269

Chapter 10  **Flow Rates and Durations of Enteral and Intravenous Infusions**  270
Introduction to Enteral and Intravenous Solutions  271
   Enteral Feedings  271
   Intravenous Infusions  272
   Intravenous Solutions  272
Equipment for IV Infusions  275
   Infusion Pumps  277
Calculations for Infusions  277
   Fluid Balance: Intake/Output  288
Summary  289
**CASE STUDY 10.1**  289
Practice Sets  290
Cumulative Review Exercises  294
