# Contents

Preface to the first edition	ix
Preface to the second edition	x
Acknowledgements	xi

## 1 Occlusion and malocclusion 1

Ideal occlusion	1
Classification of malocclusion	1
Prevalence of malocclusion	6
Aetiology of malocclusion	7
Benefits of orthodontic treatment	16
Risks of orthodontic treatment	19
Provision of orthodontic treatment	25
Monitoring orthodontic treatment	26
Further reading	29
References	29

## 2 Prenatal development of the craniofacial region 34

Embryonic origins of the head and neck	34
The prechordal plate – a molecular organizer for the brain and face	35
Early organization of the craniofacial region	38
Development of the face	41
Development of the palate	46
Development of the pharyngeal region	46
Development of the skull	50
Molecular regulation of early craniofacial development	53
Further reading	64
References	64

## 3 Postnatal growth of the craniofacial region 67

General growth of the body	67
Craniofacial growth studies	70
The skull at birth	74
Mechanisms of craniofacial bone growth	77
Theories of craniofacial growth	79
Growth of the cranial vault	83
Growth of the cranial base	85
Growth of the face	86
Growth of the mandible	92
Dentoalveolar compensation	99
Growth prediction	100

Adult craniofacial growth	104
Further reading	105
References	105

#### **4 Development of the dentition 108**

Prenatal development of the dentition	108
Postnatal development of the dentition	116
Further reading	132
References	132

#### **5 Orthodontic tooth movement 134**

Biological basis of tooth movement	134
The mechanical basis of orthodontic tooth movement	143
Further reading	160
References	160

#### **6 The orthodontic patient: Examination and diagnosis 163**

Patient's complaint and motivation	163
Dental history	163
Medical history	164
Extraoral examination	167
Intraoral examination	173
Orthodontic records	181
Cephalometric radiography	189
Further reading	223
References	224

#### **7 The orthodontic patient: Treatment planning 227**

Timing of treatment	227
Aims of treatment	230
Planning to achieve the facial aims of treatment	233
Planning to achieve the occlusal aims of treatment	238
Choice of appliance	252
Limiting factors to orthodontic treatment	253
Further reading	257
References	257

#### **8 Contemporary removable appliances 260**

Tooth movement with removable appliances	260
Components of removable appliances	262
Removable appliance design and use	268
Functional appliances	271
Orthodontic aligners – the renaissance of removable appliances?	284

Further reading	287
References	287

## **9 Contemporary fixed appliances 291**

The evolution of fixed appliances	291
Components of fixed appliances	299
Placement and manipulation of fixed appliances	317
Stages of fixed appliance treatment	319
Further reading	325
References	326

## **10 Management of the developing dentition 329**

Early loss of primary teeth	329
Prolonged retention of primary teeth	331
Selective tooth agenesis	336
Supernumerary teeth	341
Abnormalities of tooth size	345
Abnormalities of tooth form	346
Abnormalities of eruption	349
Early loss of permanent teeth	370
Digit sucking	378
Crowding in the mixed dentition	379
Crossbites in the mixed dentition	383
Skeletal problems in the mixed dentition	386
Abnormalities of tooth structure	390
Further reading	395
References	396

## **11 Management of the permanent dentition 402**

Tooth–arch size problems	402
Anteroposterior problems	415
Vertical problems	427
Transverse problems	437
Adult orthodontics	443
Obstructive sleep apnoea	449
Relapse and retention	452
Further reading	458
References	458

## **12 Orthodontics and orthognathic surgery 462**

Common facial deformities	462
Patients presenting for orthognathic surgery	462
Assessment of patients for combined treatment	465
The process of combined orthodontic surgical treatment	468

Common malocclusions and their surgical treatment	487
Further reading	495
References	495

<b>13</b>	<b>Cleft lip and palate, and syndromes affecting the craniofacial region</b>	<b>497</b>
-----------	--	------------

Identifying candidate genes for genetic conditions	497
Cleft lip and palate	500
Cleidocranial dysplasia	511
Ectodermal dysplasia	512
Hemifacial microsomia	514
Treacher Collins syndrome	516
Pierre Robin syndrome	518
Craniosynostosis	521
Oral-facial-digital syndromes	523
Holoprosencephaly	524
Fetal alcohol syndrome	525
Further reading	526
References	526

<b>14</b>	<b>Evidence-based orthodontics</b>	<b>530</b>
-----------	------------------------------------	------------

The hierarchy of evidence	530
Randomized controlled trials	531
Systematic review	533
The Cochrane collaboration	540
Further reading	541
References	541
