PHARMACOLOGY

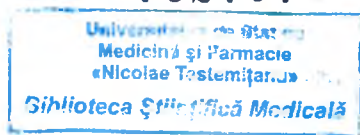

**Textbook
for medical students**

**Translation of
12th edition of Russian textbook
«Pharmacology» (2017)**

Министерство образования и науки РФ

Рекомендовано ФГАУ «Федеральный институт развития образования»
в качестве учебника для использования в учебном процессе
образовательных организаций, реализующих программы высшего
образования по специальностям 33.05.01 «Фармация»,
31.05.01 «Лечебное дело», 31.05.02 «Педиатрия»,
32.05.02 «Медико-профилактическое дело», 31.05.03 «Стоматология»

CONTENTS

PREFACE	10
I. INTRODUCTION	11
1. Subject and aims of pharmacology. Its position among other medical disciplines. Main stages of pharmacology development	11
2. Creation of new drugs	16
3. Main sections of pharmacology. Principles of classification of drugs	26
II. GENERAL PHARMACOLOGY	28
1. Drug administration routes. Absorption	29
2. Drug distribution in the body. Biological barriers. Storage	35
3. Biotransformation of drugs in the body	38
4. Routes of drug elimination from the body	41
5. Local and systemic effects of the drugs. Direct and reflex effects. Localization and mechanism of action. Drug «targets». Reversible and irreversible actions. Selective action	45
6. Dependence of pharmacotherapeutic action on drug properties and pattern of use	53
7. Importance of individual characteristics of the human body and its state for the manifestation of the drug effect	61
8. Main types of drug treatment	64
9. Principal and adverse effect. Allergic reactions. Idiosyncrasy. Toxic effects	64
10. General principles of the treatment of acute drug poisoning	67
III. SPECIAL PHARMACOLOGY	72
A. Drugs affecting afferent innervation	72
Chapter 1. Drugs decreasing sensitivity of afferent nerve endings or preventing their excitation	73
1.1. Local anesthetics	73
1.2. Astringents	79
1.3. Coating drugs	81
1.4. Adsorbents	81
Chapter 2. Drugs stimulating sensory nerve endings	82
2.1. Irritants	82

6 ♦ PHARMACOLOGY

<i>B. Drugs affecting efferent innervation</i>	85
Chapter 3. Drugs affecting cholinergic synapses	90
3.1. Drugs affecting muscarinic and nicotinic cholinceptors	96
3.2. Anticholinesterase drugs	97
3.3. Drugs affecting muscarinic cholinceptors	104
3.4. Drugs affecting nicotinic cholinceptors	110
<i>A. Drugs blocking transmission in autonomic ganglia</i> (<i>ganglionic blockers, ganglion blocking agents</i>)	112
<i>B. Drugs blocking neuromuscular transmission</i> (<i>neuromuscular relaxants or peripheral muscle relaxants</i>)	116
Chapter 4. Drugs affecting adrenergic synapses	123
4.1. Drugs stimulating adrenoceptors (adrenomimetics)	131
4.2. Drugs blocking adrenoceptors (adrenoceptor antagonists)	138
4.3. Drugs of presynaptic action	145
<i>C. Drugs regulating the functions of the central nervous system (Chapters 5–12)</i>	149
Chapter 5. General anesthetics	157
5.1. Drugs for inhalation anesthesia	160
5.2. Drugs for noninhalation anesthesia	164
5.3. Combined use of general anesthetics	166
5.4. Combined use of general anesthetics with drugs of different pharmacological groups	167
Chapter 6. Ethyl alcohol	169
Chapter 7. Hypnotics	173
7.1. Benzodiazepine receptor agonists	176
7.2. Melatonin receptor agonists	179
7.3. Hypnotics — non-selective CNS depressants	179
Chapter 8. Pain-relieving drugs (analgesics)	183
8.1. Opioid (narcotic) analgesics and their antagonists	186
8.2. Non-opioids of central action with analgesic activity	199
8.3. Analgesics with mixed mechanism of action (opioid + non-opioid)	202
Chapter 9. Antiepileptic drugs	203
Chapter 10. Antiparkinsonian drugs	211
Chapter 11. Psychotropic drugs	218
11.1. Antipsychotic drugs (neuroleptic drugs)	220
11.2. Antidepressants	227
11.3. Drugs used in manic states (antimanic drugs mood stabilizing drugs)	233
11.4. Anxiolytics (tranquilizers)	235

11.5. Sedatives	240
11.6. Psychostimulant drugs	241
11.7. Nootropic drugs (cognitive enhancers)	245
Chapter 12. Analeptics	247
<i>D. Drugs regulating functions of major organs and systems</i>	<i>250</i>
Chapter 13. Drugs affecting the respiratory system	251
13.1. Respiration stimulants	251
13.2. Antitussive drugs	253
13.3. Expectorants	255
13.4. Drugs used for the treatment of bronchospasm	256
13.5. Drugs used in acute respiratory failure	265
Chapter 14. Drugs affecting the cardiovascular system	267
14.1. Cardiotonic agents	269
14.2. Drugs used for the treatment of cardiac rhythm disturbances (antiarrhythmic drugs)	281
14.3. Drugs used for the treatment of ischemic heart disease	301
14.4. Drugs used for the treatment of cerebral blood circulation disorders	314
14.5. Antihypertensive drugs (hypotensive drugs)	322
14.6. Hypertensive drugs (drugs used for the treatment of arterial hypotension)	340
14.7. Venotropic (phlebotropic) drugs	343
Chapter 15. Drugs affecting the digestive system	352
15.1. Drugs that affect appetite	352
15.2. Drugs that affect salivary gland function	353
15.3. Drugs used for the treatment of gastric gland function disorder	354
15.4. Gastroprotectors	363
15.5. Drugs that affect gastric motility	365
15.6. Emetic and antiemetic drugs	366
15.7. Hepatoprotective drugs	370
15.8. Cholagogue drugs	372
15.9. Drugs that induce gallstone dissolution (cholelithiatic drugs)	373
15.10. Drugs used for the treatment of pancreatic failure	374
15.11. Drugs that affect intestinal motility	374
Chapter 16. Diuretics	379
16.1. Diuretics directly affecting the function of the renal tubular epithelium	383
16.2. Aldosterone antagonists	388
16.3. Osmotic diuretics	389
Chapter 17. Drugs affecting myometrium	390
Chapter 18. Drugs affecting hemopoiesis	397

8 ♦ PHARMACOLOGY

18.1. Drugs affecting erythropoiesis	398
18.2. Drugs affecting leukopoiesis	401
Chapter 19. Drugs that affect platelet aggregation, blood coagulation and fibrinolysis	403
19.1. Drugs used for the prevention and treatment of thrombosis	404
19.2. Drugs that stop bleeding (hemostatics)	420
<i>E. Drugs that control metabolic processes</i>	422
Chapter 20. Hormonal drugs	423
20.1. Hypothalamic and pituitary hormones and their drugs	425
20.2. Hormones of the epiphysis and their drugs	433
20.3. Thyroid hormones and antithyroid drugs. Calcitonin	434
20.4. Parathyroid hormones and their drugs	438
20.5. Pancreatic hormones, their drugs and synthetic antidiabetic drugs	439
20.6. Adrenocorticosteroids, their drugs and antagonists	449
20.7. Sex hormones, their drugs and derivatives, synthetic substitutes and antagonists	455
Chapter 21. Vitamins	467
21.1. Water-soluble vitamins	468
21.2. Fat-soluble vitamins	478
Chapter 22. Antiatherosclerotic drugs (drugs used for the treatment of hyperlipoproteinemia)	486
Chapter 23. Drugs used for the treatment of obesity	500
Chapter 24. Drugs used for the treatment and prevention of osteoporosis	504
Chapter 25. Drugs used for the treatment of gout	509
Chapter 26. Anti-inflammatory drugs	514
Chapter 27. Drugs affecting the immune system	529
27.1. Antiallergic drugs. Immunosuppressants	529
27.2. Immunostimulators (immunomodulators)	541
<i>F. Antimicrobial and antiparasitic drugs (Chapters 28–33)</i>	543
Chapter 28. Antiseptics and disinfectants	544
Chapter 29. Antibacterial chemotherapeutic drugs	551
29.1. Antibiotics	553
29.2. Sulfonamides	585
29.3. Quinolone derivatives	592
29.4. Synthetic antibacterial agents of various chemical structures	594
29.5. Drugs for the treatment of syphilis	597
29.6. Antituberculosis drugs	597

Chapter 30. Antiviral drugs	608
Chapter 31. Antifungal agents	621
Chapter 32. Antiprotozoal drugs	628
32.1. Drugs used for the treatment and prophylaxis of malaria	629
32.2. Drugs used for the treatment of amebiasis	634
32.3. Drugs used for the treatment of giardiasis (lambliasis)	636
32.4. Drugs used for the treatment of trichomoniasis	638
32.5. Drugs used for the treatment of toxoplasmosis	639
32.6. Drugs used for the treatment of balantidiasis	639
32.7. Drugs used for the treatment of leishmaniasis	640
32.8. Drugs used for the treatment of trypanosomiasis	640
Chapter 33. Antihelminthic drugs	641
33.1. Drugs used for the treatment of intestinal helminthiasis	641
33.2. Drugs used for the treatment of extraintestinal helminthiasis	645
Chapter 34. Antineoplastic (antiblastomic) drugs	648
34.1. Alkylating agents and related compounds	654
34.2. Antimetabolites	656
34.3. Antibiotics	659
34.4. Plant derivatives	660
34.5. Hormones and hormone antagonists	662
34.6. Enzymes	666
34.7. Cytokines	666
34.8. Monoclonal antibodies	667
34.9. Protein kinase inhibitors	667
DRUG INDEX	669
