# Content

<b>Foreword</b> DL Dumitrascu	9
<b>Chapter 1. Introduction</b> (D. Fodor)	11
<b>Chapter 2. History taking</b> (A. Chira, S.L. Popa, A.S.M. Ismaiel)	14
2.1. Anamnesis, definition	14
2.2. Principles of anamnesis (history taken)	14
2.3. Preparing for consultation/during consultation	16
2.4.2. History Taking	17
2.4.3. Identifying data	17
2.4.4. Source and reliability of history	18
2.4.5. Chief complaint	18
2.4.5.1. Pain	18
2.4.5.2. Asthenia	20
2.4.5.3. Sleep disturbance	20
2.4.5.4. Vertigo	20
2.4.5.5. Appetite	21
2.4.6. History of present illness	21
2.4.7. Medications, allergies, tobacco, alcohol, and drugs	22
2.4.8. Past history	25
2.4.8.1. Childhood illness	25
2.4.8.2. Adult illness	27
2.4.9. Family history	27
2.4.10. Personal and social history	29
2.4.10.1. Socioeconomic conditions	29
2.4.10.2. Residence	29
2.4.10.3. Occupational risk factors	30
2.5. Adapting history taking to specific situations	31
2.5.2. Elderly Patients and Dementia	31
2.5.3. Death and the Dying Patient	32
2.5.4. Alcohol and Substance Abuse	32
2.5.5. The Logorrheic Patient	33
2.5.6. The Silent Patient	33
2.5.7. The Angry or Disruptive Patient	33
2.5.8. The Patient with Impaired Hearing	34
2.5.9. The Interested Patient	34
2.5.10. The Anxious Patient	34
2.5.11. The Confusing Patient	34
2.5.12. The Sexual History	35
2.6. Synthesis, example of a structured interview	36
<b>Chapter 3. General physical examination</b>	39
3.1. General consideration (V. Militaru)	39
3.2. General physical examination -methods and techniques (L. Stoicescu)	42
3.2.1. Inspection	42
3.2.2. Palpation	42
3.2.3. Percussion	43
3.2.4. Auscultation	45
3.3. The usage of simple instruments in performing the general examination (M. Rosu)	46
3.4. The components of general physical examination	49
3.4.1. The general state of health (O. Mocan)	49
3.4.2. Mental state (behavior and mental health condition) (O. Mocan)	50
3.4.2.1. Perception and sensory disorders	51

3.4.2.2. Memory disorders	52
3.4.2.3. Thought disorders	52
3.4.2.4. Emotional disorders	53
3.4.2.5. Activity/Motor disorders	53
3.4.2.6. Consciousness disorders	54
3.4.3 The somatic conformation. Constitutional body types (A. Grosu)	56
3.4.3.1. Classification of constitutional types	57
3.4.3.2. The height and weight growth	59
3.4.4. Posture. Static and dynamic changes (A. Grosu)	63
3.4.4.1. Abnormal postures	63
3.4.4.2. Stance and balance	65
3.4.4.3. Gait assessment	66
3.4.4.4. Paresis tests	69
3.4.4.5. Muscle power	69
3.4.4.6. Muscle tone	70
3.4.4.7. Reflexes	71
3.4.4.8. Coordination	74
3.4.4.9. Involuntary movements	75
3.4.4.10. Upper or lower motor neuron syndrome	76
3.4.5. Facies and cephalic extremity (A-V. Sitar-Taut)	77
3.4.5.1. Facies	77
3.4.5.2. Ocular semiology	84
3.4.5.3. Nose semiology	88
3.4.5.4. Thyroid semiology	89
3.4.5.5. Ears semiology	90
3.4.5.6. Skull semiology	91
3.4.6. Skin and mucosa	92
3.4.6.1. The color of the skin and mucosa (S. Crisan)	92
3.4.6.2. Moisture and elasticity (S.C. Coste)	101
3.4.6.3. Skin lesions (S. Crisan)	102
3.4.6.4. Disorders of the skin appendages (S. Crisan)	112
3.4.7. Subcutaneous tissue	116
3.4.7.1. Nutritional status (L. Avram)	116
3.4.7.2. Subcutaneous edema (D. Crisan)	119
3.4.7.3. Superficial lymph nodes (S.C. Coste)	125
3.4.7.4. Collateral circulation (T.G. Alexescu)	130
3.4.8 Musculoskeletal system (E. Buzdugan)	132
3.4.9. Temperature (T.G. Alexescu, C. Vlad)	141
<b>Chapter 4. The respiratory system</b>	149
4.1. History taking in the respiratory system pathology (A. Chira)	149
4.2. Symptoms in respiratory diseases (A. Chira)	151
4.2.1. Dyspnea	152
4.2.2. Thoracic pain	153
4.2.3. Cough, expectoration	154
4.2.4. Hemoptysis	156
4.3. General physical exam in respiratory diseases (D. Rusu)	157
4.4. Respiratory physical exam in respiratory diseases (I. Duca)	158
4.4.1. Inspection	158
4.4.2. Palpation	161
4.4.3. Percussion	162
4.4.4. Auscultation	164
4.5. Complementary examinations	165

4.5.1. Imaging tests (D. Lupu)	165
4.5.2. Spirometry (D. Lupu)	171
4.5.3. Sputum examination (D. Rusu)	173
4.6 Respiratory syndromes	175
4.6.1. Bronchial syndromes (S. Popa)	175
4.6.1.1. Acute bronchitis	175
4.6.1.2. Chronic bronchitis	176
4.6.1.3. Bronchiectasis	178
4.6.1.4. Bronchial asthma	179
4.6.1.5. Chronic obstructive pulmonary disease (COPD)	181
4.6.2. Lung consolidation syndrome (A. Chira)	183
4.6.2.1. Pneumonia	183
4.6.2.2. Lung abscess	188
4.6.2.3. Pulmonary infarction	190
4.6.2.4. Lung tumors	192
4.6.3. Cavitory lung diseases (I. Duca)	192
4.6.4. Pulmonary hyperinflation syndrome - pulmonary emphysema (D. Lupu)	197
4.6.5. Pleural syndromes (S. Popa)	200
4.6.5.1. Fibrinous (dry) pleurisy	200
4.6.5.2. Pleural effusion	201
4.6.5.3. Pleurisy	203
4.6.5.4. Pachypleuritis (pleural thickening)	206
4.6.5.5. Pneumothorax	206
4.6.6. Respiratory failure (D. Rusu)	207
<b>Chapter 5. Semiology of the renal (urinary) system)</b>	211
5.1. Anamnesis in renal diseases (D. Bunea Jivanescu)	211
5.2. Symptoms present with diseases of the reno-urinary system (S.F. Tarmure)	213
5.2.1. Pain	214
5.2.2. Urination disorders	215
5.2.3. Diuresis disorders	216
5.3. Physical exam (D. Bunea Jivanescu)	218
5.3.1. General physical exam	218
5.3.2. Physical exam of the urinary system	219
5.4. Paraclinical examinations of the renal system (G. Ciulei)	221
5.4.1. Urinalysis	221
5.4.1.1. Macroscopical evaluation	222
5.4.1.2. Physical characteristics of urine	223
5.4.1.3. Chemical changes	224
5.4.1.4. Microscopic examination	225
5.4.1.5. Bacteriological examination	226
5.4.2. Renal function investigations	227
5.4.2.1. Blood tests	227
5.4.2.2. Glomerular filtration rate	228
5.4.2.3. Kidney functions related to urine dilution and concentration	228
5.4.2.4. Biochemical urine tests	229
5.4.3. Imaging exploration	229
5.4.4. Renal biopsy	230
5.5. Renal syndromes (D. Bunea Jivanescu)	230
5.5.1. Glomerular syndromes	230
5.5.1.1. Nephrotic syndrome	230
5.5.1.2. Nephritic syndrome	233
5.5.2. Tubulointerstitial nephropathies	237

5.5.2.1. Acute interstitial nephritis	237
5.5.2.2 Urinary tract infections- acute pyelonephritis	238
5.5.2.3 Chronic pyelonephritis	240
5.5.3. Renal vascular disease	241
5.5.4. Acute kidney injury	243
5.5.5. Chronic kidney disease	246
