CONTENTS

ABBREVIATIONS	5
INTRODUCTION.....	7
REGENERATIVE MEDICINE HISTORY: COMPONENTS AND CONCEPTS.....	9
I. THE CELLULARE THERAPY	18
1.1. TYPES OF STEM CELLS	18
1.1.1. Autologous stem cells	20
1.1.2. Allogeneic stem cells	21
1.1.2.1. Umbilical cord and placental celulare grafts.	22
1.1.3. Xenogenous cellulare grafts	23
1.2. CELLULARE THERAPY	28
1.2.1. Routes of cells delivery	29
1.2.2. Cellulare therapies clinical trials	34
1.2.3. The potential use of human stem cells.....	39
1.2.4. Stem cells in chronic hepatitis and liver cirrhosis treatment	39
1.2.5. Cerebral infarction treatment by stem cell.....	40
1.2.6. Stem cells in Diabetes treatment.	40
1.2.7. Human body revitalisation by stem cells.....	42
1.2.8. Contraindication for stem cells therapies	43
II TISSUE ENGINEERING.....	47
2.1. The history of tissue engineering.....	47
2.2. Tissue engineering components	49
2.2.1. Biomaterials	50
2.2.2. Cytokines	52
2.3. The biomaterials used in tissue engineering for sponges manufacture.....	52
2.4. Tissue engineering	54
2.4.1. Bioreactors	55
2.4.2. Cardiac tissue engineering.....	57
2.4.3. Liver tissues engineering	58
2.4.4. Pulmons tissue engineering	61

2.4.5. Kidney tissue engineering.....	62
2.4.5.1. Artificial kidney bioengineering	65
2.4.5.2. Kidney 3D printing	65
2.4.6. Skin Tissue engineering.....	66
2.4.7. Pancreas Tissue engineering	69
2.4.8. 3D printing. 3D printers characterization.	70
2.4.8.1. Biomimicry	71
2.4.8.2. 3D printing Technologies.....	73
2.4.8.3. Bioprinting.....	77
III. GENE THERAPY	92
3.1. Genetic diseases	92
3.2. Genetic therapy	93
3.3. Genetic therapy strategies.....	95
3.4. Vectors used in genetic therapy.....	99
3.5. Physical methods of gene transfer improving.....	105
3.6. Ethical concerns and the Weismann principle	107
IV. ETHICS IN REGENERATIVE MEDICINE.....	111
V. GRAFT STORAGE. HUMAN TISSUE AND CELLS BANK	118
5.1. Human Tissue and Cell Bank Organization	118
5.2. Automatized Informational System (AIS) to ensure quality management in the Human Tissue Bank.....	120
5.3. The Human Tissue Bank structure and management.....	130
5.4. Equipment used.....	132
VI NANOMEDICINE	138
6.1. Nanomedicine	138
6.2. Nanotherapeutic drugs	142
6.3. The interaction of nanomaterials with the living organism	146
VII. EQUIPMENTS FOR REGENERATIVE MEDICINE	160
GLOSSARY.....	169
