Contents

PART IX. THE CHEST

38. Radioimaging techniques for the respiratory system assessment <i>Georgeta Rusu, Anca Ciurea</i>	3
39. The chest – descriptive anatomy <i>Diana Sorina Feier</i>	11
40. The normal chest <i>Georgeta Rusu, Anca Ciurea</i>	18
41. Pathology of the thoracic cage and diaphragm <i>Delia Muntean</i>	27
42. Pneumonia <i>Anca Ciurea</i>	35
43. Interstitial lung disease <i>Roxana Pintican</i>	43
44. Chronic obstructive pulmonary disease <i>Delia Muntean</i>	52
45. Pleural effusions and pleural opacities <i>Roxana Pintican</i>	56
46. Atelectasis <i>Andrei Roman</i>	65
47. Lung tumors <i>Sorin M. Dudea</i>	70
48. Indications and imaging algorithms in cardiopulmonary diseases <i>Diana Sorina Feier</i>	76

PART X. THE MEDIASTINUM

49. Radioimaging techniques used in the examination of the mediastinum. Mediastinal anatomy and semeiology <i>Carolina Solomon</i>	81
50. Pathological conditions of the mediastinum <i>Carolina Solomon</i>	85

PART XI. THE HEART

51. Radioimaging techniques for exploring the heart. Notions of radiological anatomy of the heart	
<i>Călin Schiau, Simona Manole</i>	95
52. Cardiovascular elementary radioimaging semeiology	
<i>Călin Schiau, Simona Manole</i>	111
53. The pulmonary vascular syndrome	
<i>Călin Schiau, Simona Manole</i>	118
54. Tumors of the heart	
<i>Călin Schiau, Simona Manole</i>	125
55. Cardiac valvulopathies	
<i>Călin Schiau, Simona Manole</i>	131
56. Coronary artery disease	
<i>Călin Schiau, Simona Manole</i>	140
57. Cardiomyopathies, pericardial and congenital heart diseases	
<i>Călin Schiau, Simona Manole</i>	144
58. Indications and algorithms for the use of the main cardiac imaging methods according to pathology	
<i>Călin Schiau, Simona Manole</i>	156

Part XII. THE ARTERIES AND VEINS

59. Examination techniques of arteries and veins	
<i>Csaba Csutak, Andrei Lebovici</i>	161
60. The aorta	
<i>Sorin M. Dudea</i>	165
61. The pulmonary artery	
<i>Anca Ciurea</i>	169
62. The peripheral arteries	
<i>Csaba Csutak</i>	173
63. The peripheral veins	
<i>Sorin M. Dudea</i>	178
64. Indications and algorithms for the use of the main imaging methods according to the disease	
<i>Csaba Csutak, Diana Sorina Feier</i>	183

Part XIII. THE CENTRAL NERVOUS SYSTEM

65. Radioimaging techniques for central nervous system assessment.	
Normal appearance of the brain and spine	
<i>Georgeta Rusu</i>	187
66. Anatomy of the central nervous system	
<i>Delia Muntean</i>	190
67. Practical approach to image interpretation in neuroradiology	
<i>Diana Sorina Feier</i>	207
68. Stroke	
<i>Manuela Lenghel</i>	215
69. Multiple sclerosis	
<i>Andrei Lebovici</i>	222
70. Brain tumors	
<i>Andrei Lebovici</i>	225
71. The pituitary gland	
<i>Andrei Lebovici</i>	228
72. Non-traumatic vertebral and medullary pathology	
<i>Andrei Lebovici</i>	231
73. Indications and imaging algorithms in neuroradiology	
<i>Diana Sorina Feier</i>	235

Part XIV. THE HEAD AND NECK

74. Orbit, larynx and thyroid	
<i>Manuela Lenghel, Carolina Solomon</i>	241
75. Cervical lymph nodes and viscerocranium. Semeiology of the radioimaging changes	
<i>Manuela Lenghel, Carolina Solomon</i>	248

PART XV. INTERVENTIONAL RADIOLOGY

76. Vascular interventional radiology	
<i>Csaba Csutak</i>	257

77. Diagnostic applications of non-vascular interventional radiology: percutaneous image-guided biopsies	
<i>Andrei Roman</i>	261
78. Special percutaneous interventions – drainage and tumor ablation	
<i>Andrei Roman</i>	269

PART XVI. PEDIATRIC RADIOLOGY

79. Pediatric chest imaging	
<i>Roxana Popa-Stănilă</i>	277
80. Pediatric central nervous system	
<i>Roxana Popa-Stănilă</i>	290

PART XVII. CHEST, HEAD AND SPINE EMERGENCIES

81. Chest trauma	
<i>Anca Ciurea</i>	307
82. Non-traumatic and non-vascular thoracic emergencies	
<i>Anca Ciurea</i>	312
83. Head trauma	
<i>Anca Ciurea</i>	316
84. Spine trauma	
<i>Anca Ciurea</i>	325
